EDUCATION

SMK Telkom Jakarta

2026

Rekayasa Perangkat Lunak(RPL)

Jakarta Barat, Indonesia

- Relevant Coursework: Object-Oriented Programming, Database Management, Web Development, Software Engineering, Basic Networking, Operating Systems
- Clubs: Futsal

EXPERIENCE

Technical Support 24/7 Apprenticeship

Jul 2025 – Mar 2026

PT Exeed Indo Jaya

Jakarta Utara, Indonesia

- Provided technical support 24/7 for VMware vSphere environments by troubleshooting issues in customer infrastructures through a ticketing portal system. Assisted with installation support, case documentation management, and issue resolution related to virtualization platforms

Back End Developer(Teaching Factory) Intern

Feb 2025 – May 2025

PT Lokasolusi

Jakarta Barat, Indonesia

- Joined a hands-on Teaching Factory program to learn and practice back-end development in a real-world project environment, contributing to the system migration from Laravel to Go. Developed and maintained API endpoints, handled data processing between the back-end and front-end, tested API functionality and data responses to identify and fix errors during the migration process, and worked closely with the front-end team to ensure data was delivered and displayed correctly. Collaborated with team members to understand the existing Laravel system and implement its functionality in Go.

PROJECTS

Library Management System – MVC Web App

2026

PHP, Bootstrap, Composer

- Built a full-stack library management web app using **MVC architecture** with **PHP** and **Composer** for dependency management
- Designed responsive UI using **Bootstrap** for cross-device compatibility
- Implemented **MySQL** database for book inventory, member management, and borrowing records

SKILLS

Languages: Python, C++, PHP, SQL, GO, JavaScript, Java

Frameworks/Libraries: Bootstrap, jQuery, Node.js, Docker, Kubernetes

Tools/Technologies: MySQL, VMware, Photoshop, Microsoft Office, Linux, Git, Figma
